Maths

1. Magic squares!!

**MAGIC SQUARE
 ONE TWO THREE**

1	1	1	
2	2	2	
3	3	3	

Place each number in a square so that every line of three across, down and the two diagonals add up to the same total.

How many different ways can this be done?

2. Right angles!

Using the corner of an old envelope, can you find objects around the house which have right angles?

3. Investigate halves

Go on a hunt and find groups of items around the house. You might find a jar of paper clips, or buttons, some coins or hair bands. Count them out. Can you halve the number? Why? Why not?

Science

1. Diary Results

Continue your seed diaries and your hydroponics observations.

Can you use the results and create a bar graph?

2. Using your diary observations and bar graphs, answer the following question;

Which plant grew faster?

Did each plant grow at the same or similar rate?

Topic

Using your own garden, or an outdoor space which you have visited when exercising, design your own dream garden! What scents would you include? Try to think about what smells and sights you have seen when outside. Would you include a lavender plant? Would you include an apple tree? What else would be in your garden? You could include swings, benches or even a fountain. Draw this detailed design and label it, considering what materials might be included in your garden.

Muslims must always pray in a fresh, clean place, so they remove their shoes and use a prayer carpet. Using the link provided, research different styles of prayer mats and design your own. What else do you think is important to do before praying? Should we be in a quiet place? Should we be using our phones or watching the TV? Consider how we can make sure we are ready for prayers. <https://www.pinterest.co.uk/esajada/prayer-rug-art-design/>
